NICE Update
NICE: public health guidance update, 156
A. Killoran, C. Swann, K. Nolan, J. Jagroo, P. Shearn

Book Reviews
Health on the Move 2, 159
L. Owen

Evaluating Health Promotion: Practice and Methods, 3rd edn., 159
E. G. Jessop

Injury Prevention in Children: A Primer for Students and Practitioners, 160
E. Towner

Correspondence
Good quality and available urban green spaces as good quality, health and wellness for human life, 161
R. Saulle, G. La Torre

Postpartum depression screening: a Comment on Leung et al., 162
B. D. Thombs

Contributions welcome
JPH particularly welcomes submissions of articles in two new categories:

**Perspectives** – presents critical views on controversies in public health practice, policy and politics in an analytic essay format. The lead article should be no longer than 3000 words plus 5 figures/tables/illustrations, and is usually accompanied by 2 or 3 commentaries, each at about 800 words plus at most 1 table/figure/illustration. Articles and commentaries in this section are usually commissioned, but the Editors welcome authors’ ideas and proposals.

**Chekhov’s corner** – focuses on the intersection of the arts and humanities with public health practice. Wide-ranging contributions are considered; for example this might be from the perspective of a public health professional reflecting on a particular piece of art, drama or literature that has prompted them to see a public health issue in a new light, or has new relevance for today; or perhaps a perspective on a public health problem from an arts and humanities viewpoint, helping us to consider an issue or problem in a new light as a public health community. Articles should be no longer than 1500 words. Editors welcome author’s idea and proposals.
